HARDING HAS SUPPORT OF LABOR LEADER T. V. O'CONNOR

Marion, Ohio, Aug. 3.—Senator Harding held conference today with T. V. O'Connor, of Buffalo, president of the International Longshoremen's Association, at which the labor situation was discussed generally and the candidate was assured of the support of the labor leader.

Previous to his conference with Mr. O'Connor, Senator Harding had conferred with United States Senator Henry W. Aldrich, chairman of the Republican Speakers' Bureau, on matters pertaining to the speaking campaign. To what extent, if at all, the front porch campaign plan will be deviated from is understood to have been discussed.

Senator New asserted that no one in authority had said there will be no deviation from the plan and then proceeded to discuss the handpicking of a front porch campaign now as compared with the Harrison campaign in 1888 and the McKinley campaign in 1896 and 1900.

Not only are railroad rates higher, but it is impossible for the railroad to furnish equipment to conduct excursions to the candidate's home as in past years, he said.

A statement issued by Mr. O'Connor after the conference said in part: "I have heard a good deal of various leaders that are going to deliver the labor vote this year, but I want to say that no labor vote will be delivered for Wilson. But the democratic party has since then lost its claim for confidence of the country. We must restore popular confidence in our government in order to put an end to the unrest that exists. The fact is that the world is in a bad scrape, and if the United States does not keep its feet on the ground the world can't."

"I deal with all the nationalities except Asiatics, in our organization, and I know that there is a general desire to get away from entanglements with European concerns. There is a good deal of apprehension among the men, least conditions which they observe in Europe may reach here. They are determined to avoid anything of that kind if they can."

"It seems very plain to me that labor must support the republican party this year."

REVENUES FROM RAILROADS \$100,000,000 MORE YEARLY

As a Result of the Advance in Transportation Rates Government Will Receive Added Income—New Freight and Passenger Rates Will Be Made Effective on August 25, Instead of August 20—Railroads Are to Ask Canadian Railway Commissioners for Permission to Make the New Rates Operative on Transportation From the United States to the Dominion.

Washington, Aug. 3.—(By The A. P.) Increased revenues, officially estimated at \$100,000,000 annually, will accrue to the treasury as a result of the advance in transportation rates allowed the railroads. The added income for the government, officials said tonight, would be derived from increased transportation taxes—which are paid by the public—as well as through operation of the income and excise provisions of the revenue laws.

Transportation taxes for the fiscal year ending June 30 aggregated approximately \$231,000,000. This sum was made up from the three per cent. tax on freight charges amounting to \$125,000,000, the 8 per cent. tax on passenger tickets supplying \$100,000,000, and the 8 per cent. tax on Pullman charges producing \$6,000,000.

Should railroad traffic continue at its present volume, all of these amounts would be increased correspondingly with the advance permitted by the interstate commerce commission in its rate decision last Saturday. On this basis officials of the bureau of internal revenue calculate the additional taxes will aggregate \$38,500,000 on freight, \$18,500,000 on passenger and \$3,500,000 on Pullman charges.

Another source of revenue would be from income taxes levied against the railroad corporations. Railroad executives expect many of the carriers to earn sufficiently large returns under the new rates to compel the payment of income taxes for the first time since pre-war days. It is from this source that the largest portion of the remaining \$10,000,000 of their \$100,000,000 estimate. Officials placed the amount from income taxes conservatively at \$3,000,000 a year.

The wage award of \$80,000,000 a year, one of the causes for a rate advance, also will result in producing a certain return to the government. It is the wage award of \$80,000,000 a year, one of the causes for a rate advance, also will result in producing a certain return to the government.

Amounts levied on most of the workers will be small, but it was pointed out, the railroad labor army numbered more than 2,000,000 persons. From this number, officials believed the taxes would aggregate a "substantial amount, probably \$10,000,000 or more."

Officials also are studying the indirect effect the rate increase will have on revenue produced by the excise and miscellaneous taxes. Virtually all of the excise taxes are based on a percentage of the selling prices—as the so-called luxury taxes—and they regard it as certain that more revenue will be forthcoming as the prices of commodities move upward.

NEW RAILROAD RATES EFFECTIVE AUGUST 25

Washington, Aug. 3.—New freight freight rates and passenger fares will be made effective on August 25, instead of on August 20 for passenger fares and August 25 for freight tariffs, railroad officials announced tonight.

At the same time it was announced that the American railroads would ask the Canadian railway commissioners for permission to make the new rates operative on transportation from the United States to the dominion.

Decision to postpone the putting into effect of the advanced charges, authorized last Saturday by the interstate commerce commission from the dates announced yesterday was reached tonight after tariff experts of the carriers had informed Alfred H. Thom, general counsel for the Associated Railway Executives, that it would be impossible to have the blanket schedule ready before August 21. Under the orders of the commission the new schedules must be filed five days before they become effective.

Application of the new schedules to transportation to Canada, officials said, will mean that shippers will pay freight charges under the new tariffs in their classification territories unless the shipment passes through more than one group before crossing the line, in which case the inter-territorial rate which it to be advanced 3 1-3 per cent. would apply.

Canadian railways, it was said, will apply to the interstate commerce commission for authority to make the charges effective on transportation from the dominion into the United States.
